

Environmental Risks -- July Promotion

Every month I put a product line or class of business "on sale" and pay an additional 2.5% commission to my agents who submit or bind a qualifying risk during the promotional month.

My technical support has been lacking the last few months, so I'll be posting the promotions here as well as notifying agents through any other means available.

So, this month (and due to notification issues, I'll extend this promotion through August 31) - I'm providing 2.5% additional commission on all environmental risks.

This includes risks such as: Environmental contractors, environmental consultants, contractors pollution liability for non-environmental contractors, mold coverage on anyone who needs it, restoration contractors, inspectors, and site pollution risks.

Lines of business that qualify would be Professional Liability, Contractors Pollution Liability, CGL (in combo), and any executive protection lines such as D&O, EPL, or privacy liability.

Send risks! And if you would like a list of upcoming promotions, please shoot me an email ([chrisc \[at\] usrisk \[dot\] com](mailto:chrisc@usrisk.com)) and I'll send you my campaign schedule.

Stay tuned for more info....
